+94 *** *** ***

Moratuwa, Sri Lanka

Education

- University of Moratuwa

Bachelor of Business Science - 2021
(Specialization in Business Analytics)
First Class - CGPA - 3.98

Skills & Tools

AI & Machine Learning Engineering

- ***Agentic Frameworks:*** *Proficient in building autonomous agents using Google ADK and LangChain.*
- ***Generative AI & LLMs:*** *Experience with RAG (Retrieval-Augmented Generation) pipelines and fine-tuning Large Language Models.*
- ***Vector Databases:*** *Hands-on implementation of semantic search and high-dimensional data retrieval using Milvus.*
- ***Deep Learning:*** *Architecting and training neural networks using PyTorch and TensorFlow.*

Programming & Data Engineering

- ***Languages:*** *Advanced Python (NumPy, Pandas, Scikit-learn), R, and SQL (MySQL).*
- ***Database Management:*** *Designing and optimizing relational databases and vector stores for AI applications.*
- ***Version Control:*** *Collaborative development and code management using GitHub.*

Analytics & Visualization

- ***Business Intelligence:*** *Creating complex dashboards and data stories using Power BI (DAX) and Tableau.*
- ***Statistical Analysis:*** *Applying advanced analytics to derive actionable business insights and optimize model performance.*
- ***Project Management:*** *Utilizing MS Project and Jira for technical roadmap planning and milestone tracking.*

Profile

Dedicated AI Engineer with a strong foundation in Business Analytics, specializing in the development of scalable, production-grade AI systems. Currently an Associate Machine Learning Engineer focused on building Agentic AI frameworks and RAG-based systems using Google ADK, LangChain, and Milvus vector databases. My expertise lies in bridging the gap between sophisticated data modeling and real-world deployment, particularly within the e-commerce sector.

Work Experience

Jun 2025 - Present

Associate Machine Learning Engineer

iLabs (Pvt) Ltd I Battaramulla

- **AI-powered vector search service** designed for semantic product search on the Website Search function using natural language queries. By leveraging vector databases like Milvus, Embedding Models to generate high dmensional embeddings and Reranker models for higher relevance.
- **Agentic Chatbot assistant t**o provide real-time updates on product information, product recommendations, city-aware availability, order management and overall customer support. Leverages RAG-architecture to retrieve from Vector Database, Content Management System, Data Lake, and APIs.
- Build an **custom App into ChatGPT Apps** ecosystem using the Apps SDK and MCP enabling users to interact with client's product offerings with an interactive quiz to collect user information and Stripe for payments.
- Collaborate on an **AI layer integration** to existing **Customer Support System** by integrating past/similar conversation to assist Support Agents resolve Customer support requests.
- Collaborate on building a **AI Marketeer system** with Multi-Agent architecture that can analyze, strategize, create content, execute marketing campaigns to personalize the experience of users on a Website.

Dec 2024 - Jun 2025

Intern - Machine Learning

- Build a **dynamic discount model t**o predict the optimal discount to offer to users in order to maximize the conversion rates and minimize cart abandonment rates. By leveraging machine learning techniques, using user behavior, order history, and other features to make data-driven discounting decisions.
- Developed a **recommendation model** in this project predicts and recommends items to users based on their historical interactions and item/category sequences. It is designed for e-commerce or similar platforms to enhance user engagement and conversion.

Certifications

Large Language Models & Generative AI

- Generative AI with Large Language Models — AWS / DeepLearning.AI (2024)
- Finetuning Large Language Models — Lamini / DeepLearning.AI (2024)
- LangChain for LLM Application Development — LangChain / DeepLearning.AI (2024)
- Multi AI Agent Systems with CrewAI — CrewAI / DeepLearning.AI (2025)
- LLMOps by Google Cloud — DeepLearning.AI (2024)
- Quality and Safety for LLM Applications — WhyLabs / DeepLearning.AI (2024)

Vector Databases & RAG

- Vector Databases: From Embeddings to Applications — Weaviate / DeepLearning.AI (2025)
- Building Applications with Vector Databases — Pinecone / DeepLearning.AI (2025)
- Building Multimodal Search and RAG — Weaviate / DeepLearning.AI (2024)

Deep Learning & Frameworks

- PyTorch Ultimate: From Basics to Cutting-Edge — Udemy (2025)
- TensorFlow: Basic to Advanced Training — Udemy (2025)
- Intro to Deep Learning — Kaggle (2025)

Machine Learning

- Advanced Learning Algorithms — Stanford University / DeepLearning.AI (2024)
- Supervised Machine Learning: Regression and Classification — Stanford University / DeepLearning.AI (2024)
- Machine Learning and Deep Learning Projects in Python — Udemy (2024)

Volunteering

- Co-Chair Person - DesignFest, Rotaract Club of University of Moratuwa
- Potential Member, AIESEC CS University of Moratuwa
- Organizing Committee, Colombo Business Analytics Forum 2024

Awards

- Data Storm 5.0 (Advanced Analytics Competition) - Semi-FInalists
- Intellihack 4.0 (ML and AL Hackathon) - Finalists
- BI Master 1.0 (Business Intelligence Datathon) - Finalists
- BizWizards 23 (An Inter-University Business Case Analysis Competition) - Runners-up
- Infinity 3.0 (An Inter-University Business Case Study Competition) - Finalists
- Fusecura'22 (An Inter-University Corporate Challenge) - Finalists
- Maestro 2021 (A Business Case Study Competition) - Finalists
